

Aim: To understand the working of Junit assert statements by comparing two strings

Program:

```
import static org.junit.Assert.assertEquals;
import java.util.Scanner;
public class third {
    public static void main(String[] args)
    {
        Scanner in = new Scanner(System.in);
        System.out.println("Enter the username");
        String str1 = in.nextLine();
        System.out.println("Reenter the username");
        String str2 = in.nextLine();
        assertEquals(str1, str2);
    }
}
```

Output:

Input	Actual output
Ame	Ame

Input	Actual output
Ame	Ameille
